

ARGON DAC1: How to Update the Firmware

Step 01:

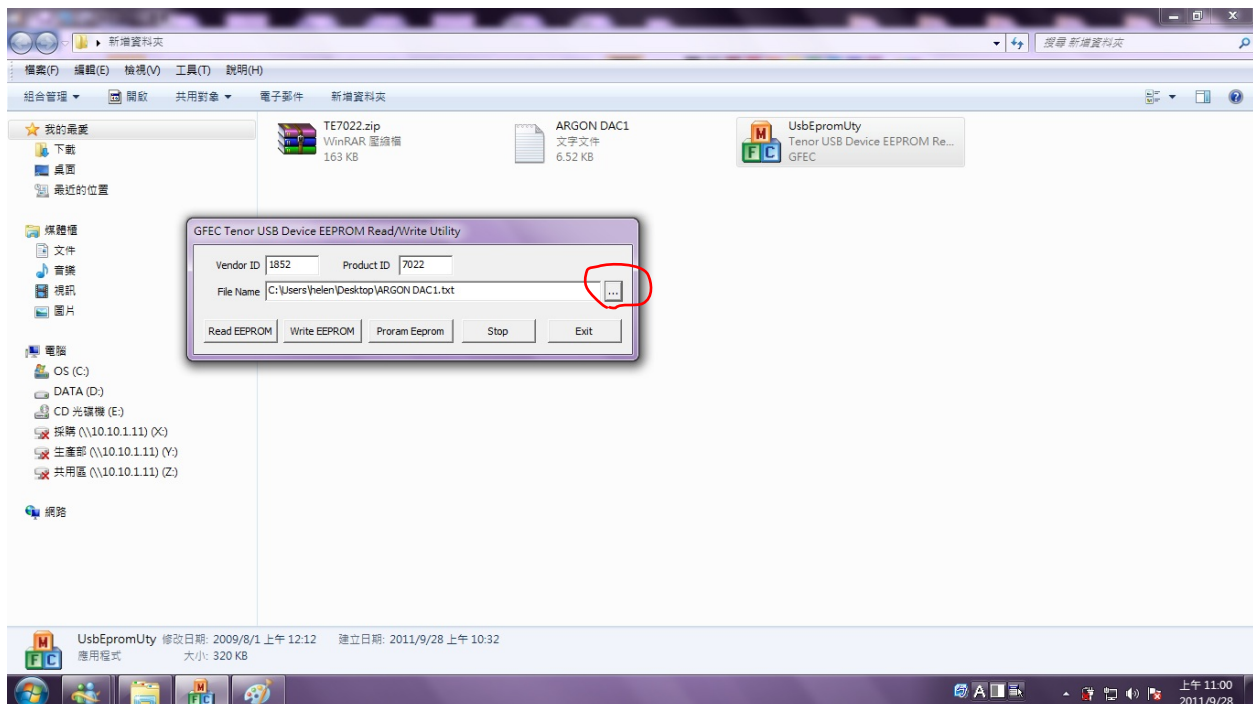

Connect DAC1 to you PC/LapTop, then DOWNLOAD TE7022.zip and unzip the folder on your PC. There will be two files: ARGON DAC1.txt and UsbEepromUty.exe

Step 02:

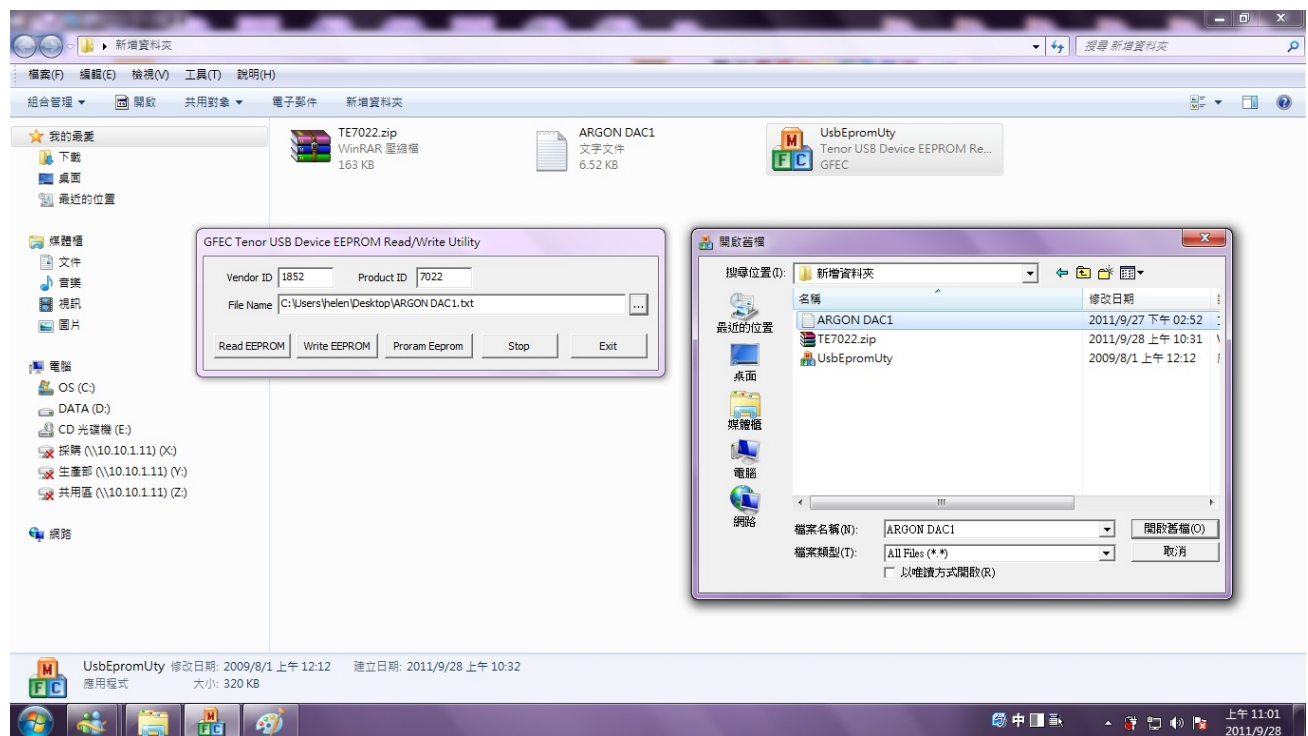

Open UsbEepromUty.exe file.

A bar will show up, and then press the small right button to browse the file.

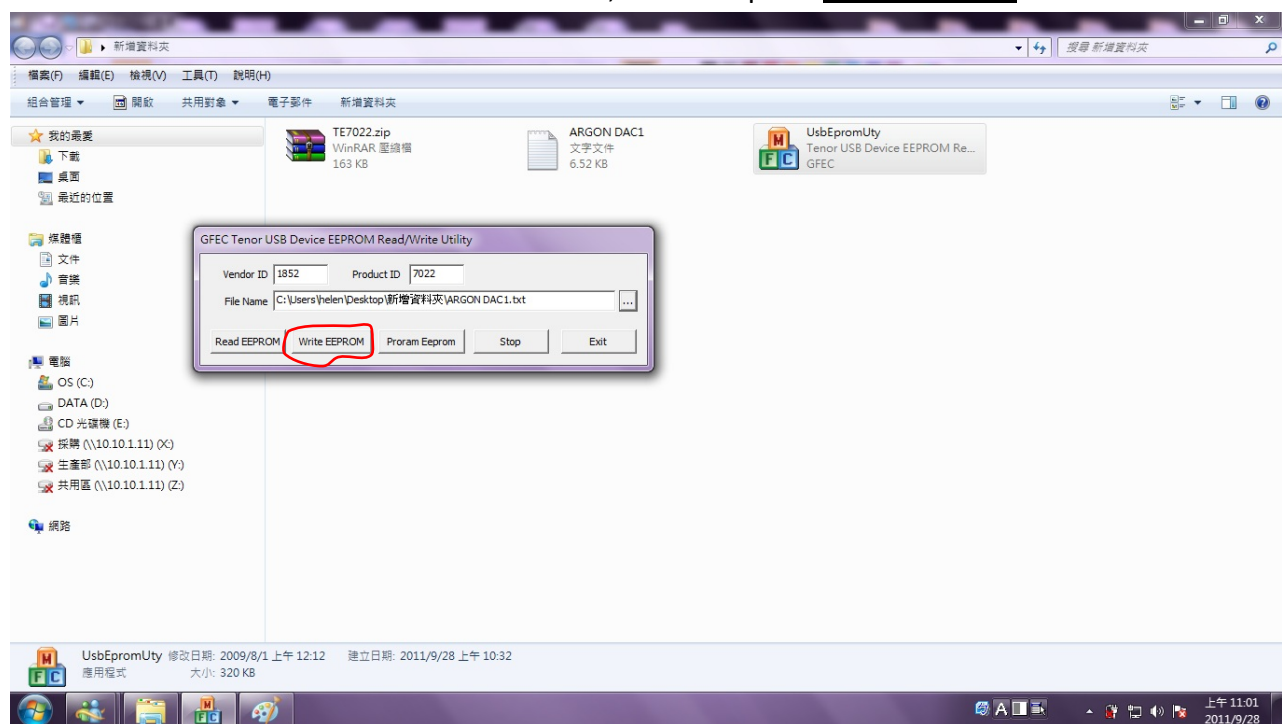

Step 03:

Choose ARGON DAC1.txt.

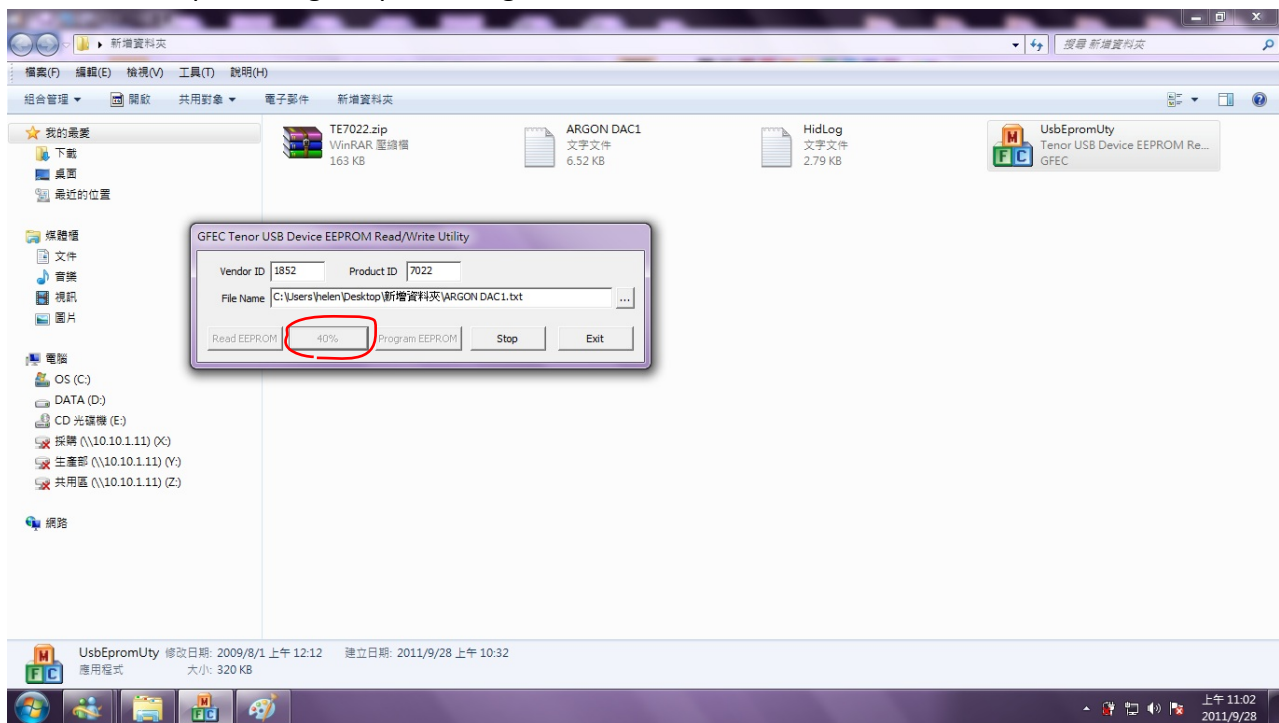

Step 04:

Make sure the File Name to be ARGON DAC01, and then press Write EEPROM.

Step 05:

Wait until the percentage of processing Write EEPROM finishes.

Step 06:

Update completes! Turn on ARGON DAC1 again (by pressing the button).
